AFRL technologies displayed at ASM

RENO, Nev. — Capt. Dan Gillen, Air Force Research Laboratory's Munitions Directorate, demonstrates the opening of the range extension wing kit for the small smart bomb, a new weapon transition, during the 41st Aerospace Sciences Meeting and Exhibit, Jan. 6-9 in Reno, Nev. Five AFRL directorates and the Air Force Office of Scientific Research exhibited the latest advancements during the technical conference, sponsored by the American Institute of Aeronautics and Astronautics. About 1,500 attended this year's meeting and exhibit. (Air Force photo by Larine Barr) @
